

STATE OF WASHINGTON
ENERGY FACILITY SITE EVALUATION COUNCIL
UTILITIES AND TRANSPORTATION COMMISSION
SOLE SOURCE POSTING

The Utilities and Transportation Commission contemplates awarding a sole source contract to Golder Associates, Inc. to provide services to perform a study related to the siting of small modular reactors (SMRs) in the state of Washington. The report shall include the following elements:

- Identification of possible locations in the state where SMRs could be suitably located
- Identification of permits and approvals likely to be needed for such a facility under current state, local, and federal permitting requirements
- Identification of studies that would need to be conducted in order to facilitate the siting of SMRs
- Recommendations on how the siting and permitting process for SMRs could be streamlined
- Recommendations for establishing general or programmatic permits or processes
- Consultation with the Washington Military Department (WMD), Washington State Department of Ecology (ECY), and Department of Health (DOH) to get input on their permitting responsibilities as they relate to SMRs.

Due to time constraints and the high level of technically complex work associated with this study the best chance of achieving a good outcome for the agency and meeting the legislative requirement of December 2015 an intent to Sole Source is being sought.

The contract will be issued on or about August 20, 2015 for six months with no option for extension. The dollar value is estimated at \$165,016.

Offerors contemplating the above requirements are required to submit capability statements detailing their ability to meet the state's requirements by August 13, 2015.

In the absence of other qualified sources, it is the state's intent to make a sole source award of the contract.
